

Triple Roller Mill

To boost performance, you can either reduce particle size down to the 500-micron range or increase throughput while maintaining your current micron size. Our solutions include fully equipped **commercial or industrial models**, or the option to **add a third set of rolls** to your existing roller mill—each designed to match the quality of a full **Scherer Inc. conversion**. All models feature **solid-to-the-shaft chilled iron rolls** and a **hydraulic roll opener** for reliable performance and easy operation.
