

ROLLER MILL

Built for wet corn (~30% moisture)
and high-hour harvest days

Model Lineup

16×52 Inline Series

- Single Inline
- Double Inline

16×84 Inline Series

- Single Inline
- Double Inline
- Triple Inline

Power

PTO or Electric

Discharge

Multiple Options
Available

Why Operators Choose Scherer

Handles ~30% moisture — clean roll, no plugging.

High-capacity machine keeps pace with up to 15,000+ BPH harvests.

Capacity increases as corn dries down.

Consistent, repeatable particle size.

Uses less HP/ton vs hammermills.

Fewer fines = better pack & feed value.

True portability: trailer, quick leveling, conveyor discharge.

Designed for uptime: magnet, scrapers, wide service access.

Integration & Service

Conveyor discharge

Spouting kits, adjustable height/angle options.

Scherer deep-cut corrugation for uniformity with consistent, repeatable particle size.

Inlet magnet protects rolls.

Agitators keep wet corn moving.

Easy roll access, centralized lube, quick change-outs.

Lower \$/ton with predictable service plans.

Backed by 30 years of roller mill expertise.
